

A little research to begin...

Building on our work on volcanoes in Year 3, our next topic is 'The Natural World' considering earthworks, tsunamis and tidal waves. To kick start the topic, Mrs Dutton and Miss Roberts would like you to create your own glossary of words that would appear in this unit of work.

Firstly though... What is a glossary?

Now, here are the words to research that we would like you to research the definitions of. Remember when creating your glossary, the words should be in alphabetical order.

1. Tsunami
2. Epicentre
3. Geology
4. Magnitude
5. Richter scale
6. Tectonic plates
7. Seismic wave
8. Geologist

Happy word researching 😊
