# Week 7, Day 4 

## 2-D shape

Each day covers one maths topic. It should take you about 1 hour or just a little more.

1. Start by reading through the Learning Reminders. They come from our PowerPoint slides.

2. Tackle the questions on the Practice Sheet. There might be a choice of either Mild (easier) or Hot (harder)!
Check the answers.

3. Finding it tricky? That's OK... have a go with a grown-up at A Bit Stuck?

4. Have I mastered the topic? A few questions to Check your understanding. Fold the page to hide the answers!

## Practice Sheet Answers

Shape and data practice (Mild)
Rectangle
Triangle
Square
Right-angled triangle
Equilateral triangle
Circle
Semi-circle
Rectangle

Shape and data practice (Hot)

## A Bit Stuck? Make a monster!

Things you will need:

- Shapes
- Scissors
- Paper
- Glue stick

What to do:
To create your monster...

- Cut out the shapes.
- Arrange and then stick them on a piece of paper to make your own monster!
- Describe your monster and all the shapes in it to an adult.
- How many of the shapes can you name?

## Check your understanding:

## Questions

My shape has four vertices and four sides. Draw a shape that it might be.

On squared paper, draw two different squares and colour them in. Can you say why they are definitely both squares?

Name a shape that has:

- No straight sides
- 3 sides, all straight
- 4 sides where two are longer than the other two

Cut out these two triangles, then put them together to make:

- a rectangle;
- a different triangle.

## Answers

My shape has four vertices and four sides. Draw a shape that it might be.
e.g.

On squared paper, draw two different squares and colour them in. Can you say why they are definitely both squares? Check drawings - all sides should be the same length. If children have used the lines of the squared paper to draw their shapes, then each side should be the same number of squares long.

Name a shape that has:

- No straight sides Circle, Oval
- 3 sides, all straight Triangle
- 4 sides where two are longer than the other two Rectangle, Oblong (a rectangle that is not a square)

Cut out these two triangles then put them together to make:

## - a rectangle

- a triangle
